

AGGRAND[®]

Natural Wildlife Food Plot Formula

Provides the primary nutrients Nitrogen, Phosphorous and Potassium

Directions: Some product settling will occur, agitate well before and during use. Once product is diluted use within 48 hours. This product should be used in conjunction with other amendments to meet plant requirements. Application recommendations on this label are general guidelines, for additional information visit us at www.aggrand.com. Soil testing is recommended. Do not freeze. Keep out of reach of children.

Soil Preparation: Prepare soil by cutting back existing vegetation, disk food plot, drag area until soil surface is even, broadcast food plot seed, re-drag and fertilize using AGGRAND Natural Wildlife Food Plot Formula following the mixing/application directions listed below.

Application Guidelines: Application rates vary according to soil conditions and other inputs used. Soil testing is recommended.

Planting: Mix 1-3 gallons of fertilizer with water at a minimum dilution rate of 20 parts water to 1 part fertilizer. Broadcast over 1 acre of seeded area.

Foliar: Mix 1-3 gallons of fertilizer with water at a minimum dilution rate of 25 parts water to 1 part fertilizer. Broadcast over 1 acre when plants are 4 to 6 inches in height using a fine mist with enough liquid to thoroughly cover leaves. Apply in early morning or late evening. Do not apply before or after rainfall or irrigation. For perennial food plots repeat foliar application every 2-3 months during good growing conditions.
